

Serling & Abramson P.C. Asbestos Attorneys

MICHIGAN'S FIRST AND FINEST

A photograph of a yellow warning sign with the word "Danger" in large, bold, black letters, underlined. Below it, the word "Asbestos" is written in a similar bold, black font. The sign is mounted on a wall that appears to be made of wood paneling or sheetrock. The sign has some wear and tear, including a small tear in the top right corner.

Asbestos in Building Materials: Risks, Exposure, and Legal Help

This guide explores how asbestos has been used in building materials, the risks of exposure, and how affected individuals can take legal steps to pursue compensation. It is provided by Serling & Abramson, P.C., a trusted law firm with over 50 years of experience in asbestos litigation.

1. Common Asbestos-Containing Materials

- Insulation (pipes, boilers)
- Floor tiles and adhesives
- Roofing shingles and felts
- Cement siding and panels
- Popcorn ceilings and textured paints

2. How Exposure Happens

Asbestos exposure typically occurs when materials are disturbed during renovations, demolitions, or repairs, causing fibers to become airborne and inhaled.

3. Health Risks

- Mesothelioma (lung/abdominal lining cancer) - Lung cancer
- Asbestosis (lung scarring)
- Other respiratory complications

4. Legal Options for Victims

If you've been exposed to asbestos and diagnosed with a related illness, you may be eligible for compensation through:

- Asbestos trust fund claims
- Personal injury lawsuits
- Wrongful death claims (for family members)

5. Steps to Take

1. Consult a doctor and document your diagnosis
2. Avoid disturbing suspected asbestos materials
3. Contact an experienced asbestos attorney for a case evaluation
